

TOP 10 TIPS

Water Saving

Water is a very precious resource

1

Remember not to leave the tap running whilst cleaning your teeth or washing vegetables.

2

Take showers instead of baths; a five minute shower uses 2-3 times less water than a bath.

3

Purchase water-efficient washing machines/dishwashers and only run them when they are full.

4

Fix dripping taps ASAP by replacing worn-out washers; replace faulty ball-valves and deal with leaking overflow pipes.

5

At home report water leaks in the street to Welsh Water
Tel: 0800 052 0140

6

At work report water leaks to the Estates Helpdesk
Tel: 01978 293354

7

Buy a dual flush toilet when replacing your loo and use the small flush when possible.

8

Put a water saving device (e.g. water hippos) in big toilet cisterns.

9

Use a water butt to collect rainwater for garden plants and lawns.

10

Avoid using sprinklers for lawns and hoses for washing cars.
