Re-use and Recycling

10 Tips to Reduce-Reuse-Recycle

Remember that people have to pick up, sort, and deal with your waste!

Remember your reusable carrier bags when shopping.

Re-use waste paper for notes.

At home take newsprint and other types of paper to the mixed recycling banks at your local supermarket or civic site.

Get into the habit of recycling every day. A few minutes each day sorting your recycling doesn't sound like much effort but it turns into a lot of work if left to the last minute.

Plan your meals in advance so that you only buy what you need, and use leftovers for lunches to reduce your food wastage each week.

Rinse out tins and cans at the end of washing-up and put in mixed recycling.

Clean out and re-use bottles, refillable containers and carrier bags.

It is now illegal to put electronic or electrical equipment in your rubbish bins. You can dispose of them at Household Recycling Centres.

If in doubt leave it out!
